Off leash dog parks have spread from coast to coast as one of the most popular additions to many park systems. They build strong community bonds, by providing a social setting for both humans and dogs to exercise physically and relax mentally. Watching dogs play and interact, fosters responsible pet ownership in the park, and on other public land as well as at home.

Dog owners and people without dogs are encouraged to join CAP and help the City add a pilot dog park.

The pilot park will provide a safe place for off leash dog activity, thus helping confine this activity from the non dog owner. The parks construction is simple and inexpensive, creating an excellent cost/benefit ratio for land use. A pilot park may pave the way for future dog parks in the area as dictated by demand.

# WE NEED YOUR HELP

BY JOINING CAP TODAY YOU CAN HELP TO MAKE A NORTHFIELD DOG PARK A REALITY

## CAP

### Our Mission

To provide a space where the lifestyles of people and dogs intersect in a safe, friendly environment, inspiring recreation, and socialization among both canines and humans.

Dog parks are a safe place to play off-leash and interact.

### TAKE ME TO THE DOG PARK!

The Northfield Park and Recreation Department has the development of a dog park in their 2006 work plan. This means that the city is setting aside park land to devote to a dog park, but needs the financial resources of CAP to purchase the infrastructure to make the park a reality. This is where you come into the picture. By joining CAP at one of the many membership levels, you will help to purchase items such as fencing, signage, and other necessities for opening a dog park.

As a non-profit organization, with an all volunteer work force, every dollar we raise will go toward the formation of a dog park.
